

DOCTORAL (PHD) STUDIES
COURSE DESCRIPTION

Course title	Field of science	Faculty	Institute
Multivariate Statistics	Mathematics (N 001)	Faculty of Mathematics and Informatics	Institute of Applied Mathematics
Study method	Number of credits	Study method	Number of credits
Lectures	0	Consultations	1
Individual work	4	Seminars	0

Course summary

In this course we study statistics related to multivariate normal distribution: Wishart distribution, estimates of covariance matrix, Hotelling T2 statistics, power of the test, Fisher's and non-central chi-square distributions, Linear and hierarchical linear models.

Main literature

1. Anderson T. W. *An introduction to multivariate statistical analysis* (3 ed.). Wiley, New York, London, 2003
2. Rao S. R. *Linear Statistical Inference and its Applications* (2 ed.). Wiley, 2001
3. Kendall M. *Multivariate analysis*. London, Charles Griffin Ltd, 1980
4. Johnson R. A., Wichern D. W. *Applied Multivariate Statistical Analysis* (5 ed.). Prentice Hall, 2002
5. Rencher. A. C. *Methods of Multivariate Analysis* (2.ed.). Wiley, 2002
