Lectures		Consultations	2
Independent study	8	Seminars	

### Course annotation

The mandatory broad-profile course “The Essential Problems of the History of Philosophy” is directly linked to the theme of a doctoral student’s dissertation, that is, the doctoral students are supposed to study all questions listed in the course description (see below) according to the general problematic range of their doctoral dissertations. The doctoral student should demonstrate the knowledge of concrete sources of philosophy, the main controversies, the problems and the means of their solution; to be able to identify the main theoretical positions and methodological premises, to compare various philosophical trends and to find the points of their contact, coincidence, and divergence. The necessary condition of a successful preparation for this exam on the part of a doctoral student is the study of primary literature in the field of contemporary philosophy as well as of primary philosophical sources.

The final exam – and the assessment of its results – consists of two parts: a) an exhaustive written answer to two questions selected from those listed in the course program; b) spoken answers to questions posed by the members of examination commission. The questions for the written answers are presented to the doctoral student by the chairman of examination commission ten working days before the appointed date of the exam. The doctoral student presents his or her answers to the exam questions – 10 000 print characters of coherent and well-argued text for each of the two questions – not later than two working days before the appointed date of the exam, sending them via the department’s e-mail address.

In his or her written answer, the doctoral student is required: 1) to disclose the main theoretical premises of the given question’s problematic, to locate the main theses, problematic fields and the points of controversies; 2) to show the relevance and utility of a given question for his or her doctoral dissertation in terms of research methods, themes, polemics, controversies, as well as in terms of other aspects. The actual exam proceeds in the form of a scholarly discussion between the doctoral student and the members of examination commission. The final assessment is determined by the doctoral student’s answers to all questions posed in the course of examination procedure: the doctoral student should be prepared to answer a few additional – specifying and qualifying – questions posed by the members of examination commission, – questions that may arise from his or her written answers to the two initial questions posed beforehand by the chairman of the examination commission, as well as to answer other questions listed in the course program and posed by the members of examination commission. The examination commission assesses the doctoral student’s ability to articulate in written and spoken form the main controversies of various philosophical trends, their diachronic and synchronic contexts and conceptual links, as well as his or her ability to showcase their relevance to the problematic of one’s dissertation.

The questions of the course program are as follows.

### Pragmatism

1. Pragmatist critique of New Age philosophy: the interplay of theory and praxis in the

concept of action.

2. Pragmatist method and pragmatist concept of truth.
3. Defining the concept of experience: W. James's "stream of consciousness"; J. Dewey's antifundamentalism.
4. Impact of pragmatist ideas on analytic philosophy (W. Quine, H. Putnam). Neopragmaticism (R. Rorty).

### **Phenomenology**

1. Phenomenological principles, methods, their development and modifications (M. Husserl, M. Merleau-Ponty, German, French and American phenomenology).
2. Hermeneutical turn in phenomenology (M. Heidegger).
3. Impact of phenomenology on existentialism, hermeneutics and postmodern philosophy.
4. Currents and problems of contemporary phenomenology.

### **Existentialism**

1. The problem of human existence in 20th century existentialism.
2. „Religious“ and „atheistic“ existentialism.

### **Hermeneutics**

1. Trends, methods and development of hermeneutics in 20th and 21st century.
2. Hermeneutics of facticity and its continuance in the philosophical hermeneutics (M. Heidegger, H.G. Gadamer).
3. Italian hermeneutics of „weak thinking“.
4. Controversy between hermeneutics and deconstruction.

### **Frankfurt school**

1. Negative dialectics of T. Adorno and M. Horkheimer.
2. Habermasian theory of communicative action.

### **Positivism of the 20th century**

1. Vienna Circle and Unity of Science movement. Philosophy of M. Schlick and R. Carnap as logical analysis.
2. Formal and empirical sciences. Criterion of empirical meaningfulness. Foundation of

knowledge. Probabilistic evaluation of scientific knowledge.

3. K. Popper's problem of demarcation between science and metaphysics. The concept of objective knowledge in K. Popper's philosophy.

4. Rethinking ideas of logical positivism in the philosophy of science. Postpositivistic criticism (T. Kuhn ir P. Feyerabend).

### **Analytic philosophy**

1. Unifying theoretical base for the analytic tradition. The concept of analytical method.

2. Logical atomism (B. Russell, early L. Wittgenstein).

3. Relation and concept of artificial and natural languages. Sintactical, semantical, pragmational and contextual analysis of language. The concept of language games (late L. Wittgenstein).

4. Cambridge-Oxford school of daily language philosophy. Speech acts theory.

5. Expansion of concept and content of language in referential semantics. Distinction of wide and narrow content. Internalism and externalism.

6. The problem of epistemical and metaphysical status of modal statements and modal truths.

### **Postmodern philosophy**

1. The problem of defining modernity and postmodernity (J. Lyotard, J. Habermas, W. Welsch).

2. Criticism or continuance of modern thinking in the Frankfurt School.

3. Ways and presuppositions of postmodern thinking (J. Baudrillard, M. Foucault, G. Deleuze, J. Derrida).
