Annotation
The course is designed for doctoral studies in Economics and Management. The aim of this course is to train highly qualified economists and managers to conduct sustainability assessments at both the macro and micro levels. Also the course aims to provide / acquire knowledge about sustainable development and about the interaction of sustainable development components and the implementation of sustainable development provisions and performance evaluation in various industries and organizations. The course aims to teach to use the system of sustainable development indicators for policies, organizations, projects, technologies, products, etc. sustainability assessments.
Main topics: 1. Concepts of sustainable development. 2. Components of sustainable development and their interaction. 3. Priorities and tasks of the country's sustainable development. 4. Sustainable development indicators and their measurement problems. 5. Sustainable production. 6. Sustainable consumption. 9. Institutions implementing sustainable development. 10. EU Sustainable Development Strategy, Lithuanian Sustainable Development Strategy. 11. Criteria for the assessment of sustainability, methods and their applications 12. Assessment of the sustainability of organizations. 11. Sustainable development and corporate social responsibility. 12. Sustainable development and climate change.
