Purpose of the course unit (module): programme competences to be developed

Media Linguistics II is an integral part of Media Discourse I and III, but it can also be taken as a separate course. It aims to provide students with a deeper understanding and practical skills of media discourse analysis by focusing on semantic, multimodal and cross-cultural aspects. From the cognitive semantic perspective, the students will analyse media discourse by applying the theory of Figure and Ground (Talmy) and the Critical Metaphor Theory (Charteris-Black, Musolff, Koller) with a focus on figurative language, scenarios and evaluation. From the multimodal perspective, the students will be introduced to the core premises of intertextuality and main approaches to the analysis of non-verbal language, such as body movements, still and moving visual images, as defined within the systemic functional linguistic and the cognitive linguistic frameworks. From the cross-cultural perspective, the students will explore how different cultural contexts influence the production, reception and interpretation of media messages. Cognitive, social, personal, linguistic, cultural and research competences will be developed in the course.

Learning outcomes of the course unit (module)	Teaching and learning methods	Assessment methods
Learning outcomes resulting from the generic competences : - Ability to find, analyse, synthesise and evaluate data needed for media studies and for professional, cultural, and creative activities; integrate knowledge, apply the acquired knowledge in practice; - Ability to generate ideas and knowledge, independently find appropriate forms of	Interactive lectures; Seminars; Individual work (reading and analysing research articles); In-class discussions; Practical assignments; Creative tasks; Presentations and peer review; Research project. Assessment strategy	Weight, %	Deadline	Assessment criteria
Continuous assessment			
Cognitive semantic level of media discourse analysis (50%)			
Test (theory and practice)	20	Week 10	20% (2 points) The test will consist of 40 questions (10 open-ended and 30 closed-ended).
Project: Figurative language in the media	30	Week 14, 15, 16	30% (3 points) (Assessment criteria: methodological rigour and in-depth discussion of the results)
Multimodal analysis in media discourse (25%)			
Project: Multimodality in the media	25	Week 8	25% (2.5 points) (Assessment criteria: the student's answer demonstrates successful incorporation of theoretical framework and methodological considerations, reasoning is logical, consistent, and motivated, conclusions summarize main findings).
Cross-cultural aspect in media discourse (25%)			
Project: Decoding the cases of media's shaping society's ideology (from cross-cultural perspective)	25	Week 16	25% (2.5 points) (assessment criteria: the students' analysis of the chosen cases (at least three culturally diverse) demonstrates their competences to envisage cultural aspects and demonstrate their manifestation in the chosen media outcome(s), integrate theoretical background into provided interpretations)
